PROFILE

Cloud Engineer, **AWS Certified Cloud Practitioner** in charge of **Cloud & DevOps at MCA ELITES** since 2024, former **founder of Mon Coach Adapté**. I design and deploy **highly available multi-tier AWS** infrastructure (multi-AZ VPC, ALB, Auto Scaling, RDS, EFS) as **Infrastructure as Code** with **Terraform**, secured (IAM, least privilege) and monitored (CloudWatch, SNS). Self-driven and entrepreneurial, seeking a **Cloud Engineer** role.

TECHNICAL SKILLS

AWS (Amazon Web Services): EC2, AMI, Auto Scaling, Load Balancer (ALB), VPC, RDS, EFS, S3, CloudFront, Route 53, IAM
AWS Fundamentals: Shared Responsibility Model, Well-Architected Framework, Regions / Availability Zones, cost
Infrastructure as Code (IaC): Terraform — VPC, EC2, ALB, Auto Scaling, RDS, EFS; plan / apply, variables, outputs
Networking & Security: Multi-AZ VPC, public / private subnets, NAT Gateway, bastion host, Security Groups, IAM
Monitoring & Observability: CloudWatch, SNS alerting, Prometheus, Grafana, Sentry, health checks, logging
Containers / Docker: Docker — Dockerfile, images, containers, containerised testing, health checks
CI/CD: GitHub Actions — build, automated testing, continuous deployment (Vercel / Netlify)
Linux / OS administration: Ubuntu, Debian, Amazon Linux — packages, permissions, services, SSH, Apache
Version control: Git / GitHub — branching, commits, merges, pull requests
Architecture & AI: Highly available multi-tier architecture — Generative AI (OpenAI, Claude APIs)
Currently learning: *Kubernetes, Python — first steps*

PROFESSIONAL EXPERIENCE

Cloud & DevOps — MCA ELITES
2024 – Present

Stack: AWS (EC2 · S3 · CloudFront · Route 53 · IAM · CloudWatch) · Terraform · CI/CD · GitHub Actions · Sentry

- **AWS infrastructure as Infrastructure as Code with Terraform**: **EC2**, **S3**, content delivery with **CloudFront**, DNS on **Route 53**, least-privilege **IAM**, **CloudWatch** monitoring.
- **Built and deployed a SaaS application**: designed the **architecture**, released to production and operate it.
- **CI/CD** with **GitHub Actions** (build, **automated tests**, deployment), **monitoring** with **Sentry**.

Cloud Support — Calibre Biometrics
2024 – 2025 · Remote

- **Cloud support**: handling user requests, troubleshooting and resolving incidents on cloud services.
- **Ticket management**: prioritisation, follow-up, escalation to technical teams, documentation of fixes.

Cloud Support — Inbound Health
2023 – 2024 · Remote

- **Cloud support**: troubleshooting and resolving incidents on cloud applications and services, access issues.
- **Ticket management** from intake to resolution: follow-up, user communication, knowledge base.

Founder & Development Project Manager — Mon Coach Adapté
2020 – 2024

- **End-to-end project management**: scoping, planning, prioritisation, on-time delivery.
- **Product development**: designed and launched a health & fitness web app, from idea to production.
- **Business development**: built the offer, prospected, managed and retained clients.
- **Partnerships**: set up and managed partnerships with professionals and organisations.

PERSONAL PROJECTS

AI assistant for rideshare (VTC) drivers
Personal project

Stack: Generative AI · OpenAI / Claude API · Docker · CI/CD · CloudWatch · Prometheus / Grafana

- Designed and built an AI assistant for rideshare drivers through **LLM API integration** (**OpenAI / Claude**).

CERTIFICATION, EDUCATION & LANGUAGES

- **AWS Certified Cloud Practitioner** — Amazon Web Services, 2026 (verifiable Credly badge)
- **AWS Cloud Practitioner training** — Udemy & AWS Skill Builder: AWS services, security, IAM, networking, pricing
- **Bachelor's degree (Licence) — Sport Science, Adapted Physical Activity (APA)** — UFR STAPS, Rouen, France, 2019
- **Languages** — French (native) · English (professional working proficiency)
